

A1.03.02.- Activity Card

Workshop Title	A1.03.02. Introduction To Programming
Level	A1
Duration	3 hours
Goals	Teaching the Terms "Data Generation" and "Variable Declaration"
Workshop Outputs	<ul style="list-style-type: none"> 1- Learning Data Generation 2- Learning Variable Declaration 3- Intermediate-Level Learning of Concurrent Systems
Required Materials	1- Computer
Description of Activity	Coding across multiple systems ensures the synchronized operation of systems concurrently. Creating variables and establishing conditions based on these variables lead to the development of new functions. In these systems, continuous loops and conditional structures are taught to create basic-level games.
